CO2

Take appropriate decisions regarding volume of output and to evaluate the social cost of production. (Cognitive knowledge level: Apply)

PART A (Answer All Questions)

Cognitive level

CO

Marks

1	For each point – underutilized, efficient, unattainable (1 mark each) PPC should be concave and have correctly labelled axis	L2	CO1	3
2	Each stage carries 1 mark TU increases, MU decreases but is positive TU increases at decreasing rate, reaches maximum. MU decreases and reaches 0 TU decreases, MU goes negative	L3	CO1	3
3	Correct definition along with equation for break-even point and the shutdown point – 1.5 marks each	L2	CO2	3
4	Three correctly named and labelled technical progress diagrams (3*1 mark each)	L3	CO2	3
5	Definition of opportunity cost and sunk cost (1 mark each). Example carries 0.5 marks each.	L2	CO2	3

PART B

6	a) (i) Law of demand (1 mark) Three determinants of demand with explanation (3* 1 mark each) Each correctly drawn figure (4*1 mark each) Correctly stated value of elasticity (4*0.5 marks each) b) Steps (2 marks) Final value = -1.2 (1 mark) Complementary goods (1 mark)	L2	CO1	10+4
7	a) Name of the short run and long run law (2*1 mark each) Three stages name (3*0.5 marks each) Explanation of each stage with examples (3*0.5 marks each) Correctly labelled diagram (2 marks) b) Three stages of returns to scale (3*1 mark each) (ii) Q= 60 (1 mark) APL (1.5 marks) MPL (1.5 marks)	L3	CO2	7+7

9	Four classification (<i>4*0.5 each= 2 marks</i>) Correct definition of economies of scale and diseconomies of scale (<i>2*1 mark each = 2 marks</i>) Correct definition of other 4 (<i>3 marks</i>)	L2	CO2	7
---	--	----	-----	---

L1-Remember

L2- Understand

L3- Apply

L4- Analyze

L5-Evaluate

L6-Create
